- 3 Bill is staying in a cottage. _____
- 4 Bill loves zorbing and bungee jumping. _____
- 5 Carole says it's raining. _____

Mark: ____ / 10

Reading

Spiders!

There are over 43,000 species of spiders worldwide. These eight-legged creatures are on every continent except for Antarctica. Most spiders are predators: they eat other spiders or insects. Some large spiders also eat small animals – for example, frogs, lizards and even birds. There are also tropical spiders that don't eat animals. They eat parts of plants, such as flower buds. There's a 'vegetarian' spider in Central America which feeds on parts of acacia trees.

Spiders usually catch insects in their webs, but many like hunting. There's a spider that is a really good hunter. It's called the huntsman spider. I want to find out more about the huntsman spider, so I'm here with Chris Richardson, an expert on spiders. I'm watching him film a documentary about spiders for the BBC. Chris, can you tell us what is happening?

'We are watching a huntsman spider right now. It's hiding under a leaf, waiting for an insect to come near it. It's not moving at all. It has to stay still so that the insect doesn't get frightened and run away. Huntsman spiders often wait for many hours in one place,' he adds. 'A small insect is coming closer to our huntsman spider. What's it doing? It's still waiting patiently ... Wow, did you see that? The huntsman spider quickly jumped on the insect and bit it!'

We asked Chris: 'Are there many dangerous spiders?' 'Yes, there are! There are some dangerous spiders around the world that can kill people, such as the mouse spider and the black widow spider, but most spiders are scared of people and run away when they see humans. Tarantulas dig a small hole in the ground and hide away from danger; others climb on trees or hide under rocks.'

'Some spiders are good mothers,' says Chris. 'They look after their babies well. Let me show you a film we took yesterday... Can you see the spider sitting on what looks like a white bag? It's a female huntsman spider. There are up to two hundred eggs in the bag, which is called a sac. She sits on the sac and doesn't eat for three weeks. Can you see another spider carrying something on its back? That's a female wolf spider. She carries around a hundred babies on her back until they mature and climb off. Spiders are everywhere! Maybe there's one climbing the wall, making a web or hiding somewhere in your room right now.'

4 Read the text and decide if the statements are true (T) or false (F).

- 1 Some spiders eat plants instead of other animals. ____
- 2 All spiders hunt for their food. ____
- 3 Chris is filming a huntsman spider. ____
- 4 Chris is making movie. ____
- 5 Some spiders, like mouse spiders, can kill people. ____
- 6 When in danger, tarantulas run away. ____
- 7 The female huntsman spider keeps her eggs in a bag called a sac. ____
- 8 Spiders are bad mothers. ____
- 9 When the female huntsman spider sits on her eggs, she doesn't eat anything for about five weeks. ____
- 10 The female wolf spider carries her young on her legs. ____

Mark: ____ / **10**

Writing

- 5 Write a description of a photo showing an animal hunting. Remember to use the present continuous to describe what is happening in your photo.**

Follow the plan:

Paragraph 1: Introduce the photo and describe what is happening in it.

Paragraph 2: Remember to say where things are happening in the photo.

Paragraph 3: Include any other important information.

Paragraph 4: Write a conclusion.

Challenge!

6 Complete the dialogue with the correct answers (a–c).

Sarah Hi, Jen. How are you?

Jen I'm fine! I Today I ¹ _____ my sister in Eastbourne and we're ² _____ to the beach. It's great here! We do canoeing, surfing and diving during the week, and at weekends we go on trips to towns and small ³ _____ around Eastbourne. The weather is fantastic here. It's sunny and hot every day. There are many children playing in the parks at the moment. What ⁴ _____ today?

Sarah I'm at home. I'm studying for my exams. I don't like maths and I'm not ⁵ _____ history. I don't like studying! It's cold, ⁶ _____ and raining, so I'm staying inside today. At the moment, I'm watching a wildlife documentary about the sand cat. It's a wild cat that lives in the deserts of northern Africa and some parts of Asia. It doesn't mind really cold or very hot weather and can live in temperatures from -5°C to 52°C! It can also live a long way from water.

Jen That's interesting! ⁷ _____ ?

Sarah It digs a hole in the sand and sleeps there. It's a predator – it eats small animals and birds. One of them is looking for some food now. It's running very ⁸ _____ !
Anyway, how about going white water rafting when you get back?

Jen That's a great idea!

1 **a** 'm visiting **b** visit **c** 's visiting

2 **a** cycling **b** cycle **c** cycled

3 **a** capitals **b** villages **c** suburbs

4 **a** do you do **b** you do **c** are you doing

5 **a** dislike **b** into **c** like

6 **a** wind **b** winding **c** windy

7 **a** Where's it sleeping **b** Where does it sleep **c** Where it sleeps

8 **a** quick **b** quickly **c** quicker
