____/5

Unit 6 Test | A

Reading

- 6 Read the article about a health app and complete the sentences. Use no more than three words in each gap.**

The art of health and fitness

Strava is one of the most used health apps in the world. It launched with a few thousand users in 2009, but more than 95 million people have now downloaded it and use the app regularly. At first, only cyclists used it. Today, however, it is possible to use Strava for 31 different sports, including running, walking, swimming, skiing, mountain climbing, kitesurfing and even paddleboarding.

People use the app to record their route while they are exercising. It does other things, too, such as recording your heart rate, counting your steps, showing how many calories you burn, and calculating your average speed while running and cycling. People can join Strava clubs with athletes they know. They can also compete with other athletes around the world to win virtual trophies and medals.

But did you know that some people use the app to create art? These people record a carefully-planned route so that it looks like a picture when they finish. They spend days and months planning these activities. They use traditional maps and computers to help them. One of the most famous pieces of Strava art is an image of a dragon. Two runners called Martyn Driscoll and Alan Stone created this in 2017 by running almost 45 kilometres in nine hours in the mountains of Wales.

Anthony Hoyte uses the health and fitness app to record his bike rides... and to create Strava art. He started in 2016 with his first one – a simple image of a dog in the city of Cheltenham in the south of England. He continued and his Strava art got more detailed and more ambitious. In 2017, he cycled 141 kilometres to create a picture of a snowman in London. Then, in 2021, he cycled 121 kilometres in the same city to create a picture of man. He raised a lot of money for charity when he did this. Now, Anthony has made so many pictures using Strava that he is sometimes called ‘Picasso’.

If you use a health and fitness app like Strava, why not consider being an artist as well as an athlete?

- 0 More people use Strava today than in the past.
- 1 At first, you could only use the app with _____ sport.
- 2 The app lets runners and cyclists know how _____ they are going.
- 3 People sometimes plan _____ because they want to create art.
- 4 Two runners took nine hours in the Welsh _____ to create a picture of a dragon.
- 5 Anthony Hoyte's first piece of Strava art was a picture of _____.

____/10
