Fashions for this autumn

What's happening in the fashion world this season? We sent Rebecca Langton to Paris to watch the shows and report on the latest trends.

Nothing stays the same for long in the fashion world and this year that's very true. Last year everything was black or grey. No more! This season bright colours are back in fashion – red, orange, yellow and pink are everywhere.

This season's material is wool: wool pullovers, wool skirts and suits. Nowadays wool comes in thousands of bright colours and patterns and designers are using this traditional material in lots of new ways. A thick wool pullover with a loose skirt is a very popular look. With leather boots and bags this is a style you can wear at work or at the weekend. Wool is comfortable to wear and very warm, so this is a great look for cold autumn and winter days.

Designers are also using bright colours and patterns for evening wear. Most designers are using silk and skirts are long and loose, with gold or silver shoes. The style is luxurious and elegant – perfect for parties and special events.

Weather wise

Can the weather really affect our health and our moods? Read on and find out!

The sun

- The sun can be good for us. It gives us vitamin D. This is very important for young people when they are growing.
- But the sun can also be bad for us. A lot of sun can hurt our skin very badly – a good suntan really is not healthy.

Hot weather

- Hot weather can be bad for us. We lose water from our bodies and that can be dangerous. It's a good idea to drink a lot of water when it's hot.
- Very hot weather can also affect our moods. In hot weather people often get tired, have headaches and sleep badly. It can also affect people with depression quite badly.

Cold weather

- A lot of old people have problems when it's very cold because their body temperature falls quickly and they become sick.
- Some people become very depressed in cold, dark weather. They can't sleep and they don't eat a lot.
- Cold weather can be good for us, too: people often feel very strong and healthy in the mountains because the cold air is very clean and relaxing.

b Read the text again and decide if these statements are true (T) or false (F).

The future of the book

Do you like books? Do you like touching the paper? Well, enjoy it now because the e-book is coming!

As long ago as the early 1990s books were available in digital form. It was possible to go online and read one, but obviously, that isn't very convenient. Then, in the late 1990s, the first e-book readers arrived. Now there are several e-book readers such as Amazon's Kindle and the iPad, so you can read your e-books in digital form anywhere.

What's so good about e-books? Well, they're better than real books in several ways. They're more convenient: you can put thousands of books on an e-book reader. They're smaller and lighter to carry than several real books – much better

when you go on holiday! Digital books are usually cheaper than physical books and they're more versatile – you can change the size of the text on the screen, for example, or you can change the language.

Why don't we all have e-books? There are a few problems: the e-book reader is still quite expensive – more expensive than buying a lot of books – and it's heavier than a real book if you want to take it to work, for example. Real books are more hard-wearing than e-book readers. If a real book falls onto the ground, it doesn't break, but an e-book reader can break. Real books are more attractive, too – you can wrap them and give them as presents.

So, e-book or real book? For now, at least, we can choose ...

Dan's film choice

This week I look at three films that are not really the same at all, but have some comedy in them.

1 *The Ghost* (thriller, US, 127 minutes)

Starring Pierce Brosnan (ex-James Bond) and Ewan McGregor

The Ghost (Ewan McGregor) is a writer. He gets the job of writing an ex-British Prime Minister's life story, after the first writer dies in an accident. But was it really an accident?

My opinion: a really interesting thriller, with some comedy

2 *It's a wonderful (after)life*

(comedy horror, UK, 100 minutes)

Starring Sanjeev Baskar and Goldy Notay

Mrs Sethi wants to find a husband for her daughter, who is not very pretty and has strong opinions. She introduces her daughter to several men, but they all disappear after eating at Mrs Sethi's house.

My opinion: very funny, but not very interesting; a silly idea

3 *The Joneses* (comedy drama, US, 96 minutes)

Starring David Duchovny (from *The X-Files*) and Demi Moore

Steve and Kate Jones have the perfect family and the perfect life. Kate is beautiful and fashionable. Steve is a rich, successful businessman. Their children are the cleverest in the school. Everyone wants to be like them, but are they so perfect?

My opinion: a really unusual idea, a bit like *The Truman Show* in some ways, not very funny

Citybug electric scooter

Star rating ★★★★★

Commuting in big cities is getting more and more difficult. You can't park cars. Buses are slow. Trains are expensive and crowded. What can you do?

Cycling is the answer for many people. It's great if your city streets are flat and you are fit and have lots of *energy*. But many people get tired and it's very difficult to cycle up *hills*.

So, if you want to find an easy way to commute and you don't have a lot of energy, try the Citybug electric scooter.

The Citybug has an electric engine with a *top speed* of fourteen miles per hour (twenty-two kilometres per hour). It loves going up hills! Because the Citybug is electric, you don't need to go to the *petrol station*! You just *connect* the Citybug to the electricity in your house for one or two hours. So it's very cheap. Riding the Citybug

is easy, but the seat and the *wheels* are small, so it isn't very comfortable. Of course it isn't fast and it weighs 21 kg, so it's quite heavy. But it's easy to park and you don't need a driving licence, so adults or children can use it.

Mae Jemison

This week we look at a real adventurer:

Mae Jemison.

Mae has done many amazing things in her life, but perhaps the most amazing and important one is that she has been into space – she went on the space shuttle *Endeavour* in 1992. She was the first African-American woman astronaut. For this reason alone we can call Mae an adventurer, but she's done a lot more.

Mae was born in 1956 and when she was a child, she didn't know if she wanted to be a doctor or a dancer. She became a doctor, but she's also danced on stage and has produced several stage shows of modern jazz and African dance.

Mae has travelled all over the world: she went to Kenya, Cuba and Thailand during her studies to be a doctor in the late 1970s. She left university in 1981 and in 1983 she became a member of the

Peace Corps – that's an organisation for young American people to help people in poor countries. Mae worked in West Africa between 1983 and 1985 as a doctor. She has also worked as a general doctor in the United States and she joined NASA in 1987 and became an astronaut.

Not all of Mae's achievements are about hard work. She's written a book and she's also appeared in a television show – she was in an episode of *Star Trek* in 1993. She was the first real astronaut to appear in the show!

- a She went to Kenya and Cuba. 1
- b She joined NASA.

- e She went into space.
- f She joined the Peace Corps.

2 Read the text again and decide if these statements are true (T) or false (F).

And be sure to write down if you can't come on one of the days. Then write your name and student number and sign it. OK?
