TAPESCRIPT

The time is now twenty-five past four. We have five minutes before our popular drama, *Oak Road*, begins, so we've got enough time to talk about what's on later. At five past five, we have chef Frank Dawson with his series on food from around the world. Frank's already given us a wonderful recipe for Indian curry and we've also seen him doing Mexican rice. Well, today it's salmon sushi. Sounds delicious! Then it'll be time for *Film of the week*. Remember last week we saw *Inception* – that wonderful thriller set in the future. Tonight we're going to take a break from science fiction – we've chosen an animated film which we think you'll enjoy very much. Then the documentary at half past nine is about city wildlife, the kinds of animals that live in our gardens or under the rubbish bins. Definitely not for the easily frightened! No soft furry pets like cats or dogs but you will see bats, snakes and rats. And then if you're still awake after that, ski champion Rob Forrest is on our late-night chat show. He'll tell us some interesting things about his life as a skier – he's hurt his knees more often than he can count, he's broken his arms and his legs several times but one thing he's never had in all that freezing cold snow is flu! How strange ... We hope you'll enjoy our programmes tonight but now, sit back and relax ... as it's time for our afternoon soap opera...
