- The of China is 1.5 billion.
- The natural of the orangutan is the rainforests of Indonesia and Malaysia.
- The tiger is now – there are fewer than 4,000 in the wild.
- have been on the Earth for around 200,000 years.
- Too much, or not enough, rain is bad for, and can stop them growing.

4 Complete the sentences with a phrase with *at*.

- I've finished my essay *at long last* .
- There are 127 million people in Japan.
-, people hunted animals for food. Now they do it for sport.
- This beautiful landscape shows Italy
- Many sea creatures are because of plastic waste.
- When I got home, I switched on the TV
-, there are only around 70,000 orangutans left in the wild.

5 Choose the correct options.

As our ¹ increases, there is more pressure on the ² At ³, one of the biggest problems is plastic waste. At ⁴ 8 million tonnes of plastic enters the ocean every year, and we aren't doing ⁵ to clear it up. The oceans, of course, are the ⁶ of a huge number of ⁷, such as fish, dolphins and ⁸ species of whale. Many of them eat this plastic. When a fish, for example, eats some plastic, a bird might eat it ⁹ The bird will then be at ¹⁰ of dying, because it can't eat proper food ¹¹ – its stomach is full of plastic. Not only that, but when ¹² eat these fish, the plastic can enter our stomachs, too.
